Imran Jahid Khan

jahidmebuet@gmail.com • linkedin.com/in/ijk37 • github.com/ijk37
ijk37.com • Google Scholar • 0009-0007-2666-3354 • Tuskegee, AL, USA

Research Interests

Security and Resilience of Cyber-Physical Systems • Sensor Attacks, Anomaly Detection, and Recovery • Robust Reinforcement Learning for Control • Cloud-Controlled and Medical CPS • Blockchain-Based Integrity Verification

Technical Skills

Programming & Tools: Python, C/C++, R, SQL, MATLAB; Git/GitHub, Linux, LaTeX

ML / RL: PyTorch; Q-learning, DQN, PPO; LSTM and LSTM Autoencoders; Anomaly Detection; State Reconstruction

Simulation: Gymnasium (CartPole, LunarLander), Simglucose (artificial-pancreas simulator)

Education

Tuskegee University, Alabama, USA *Aug 2025 – May 2027 (expected)*
M.S. in Information Systems and Computer Security
Advisor: Dr. Mohammad Arafatur Rahman
Relevant Coursework: Programming Language (C++); Information Security; Network Security and Management; Data Networks & Cloud Computing; Data Mining & Machine Learning; Statistics with R; Data Analytics; Big Data Analytics; Database Systems.

Bangladesh University of Engineering & Technology (BUET), Dhaka *2011 – 2016*
B.Sc. in Mechanical Engineering
Thesis: Wind Turbine Blade Design for Optimum Power Output.
Relevant Coursework: Computer Programming Language (C); Calculus; Linear Algebra; Ordinary & Partial Differential Equations; Complex Variables & Fourier Analysis; Numerical Analysis.

Standardized Tests

GRE: 322 (Quantitative 167, Verbal 155, Analytical Writing 3.5), Dec 2024

Publications

PUBLISHED CONFERENCE PAPERS

SUBMITTED / UNDER REVIEW

[11] M. Hossain, **I. J. Khan**, M. Rahman, and F. Wu, "Evaluating Learning Efficiency and Computational Trade-Offs in Classical and Quantum Reinforcement Learning Using a CartPole Testbed," submitted to *IEEE BigData 2026*.

Poster Presentation

"Evaluating Q-Learning Rewards in Noisy Cloud-Based Cyber-Physical Systems," *AWS-MLU AI/ML Fall Teaching and Research Symposium & Student Poster Session*, 2025.

Research Experience

Graduate Research Assistant *Aug 2025 – Present*
Dept. of Computer Science, Tuskegee University • Advisor: Dr. Mohammad Arafatur Rahman

- Built a cloud-controlled Q-learning CartPole testbed; showed that low-variance observation noise interacts non-linearly with environmental stress (inclined surface), cutting mean survival time at the steepest incline from 4.82 s to 1.44 s [2].
- Evaluated six DQN training and reconstruction strategies across 240,000 episode records under Gaussian noise and randomized replay; under all-state replay, LSTM reconstruction had the highest mean survival (7.46 s), beating mixed-attack-aware DQN in all five runs; its edge over recurrent DQN was not significant [7].
- Combined a PPO controller, an LSTM-autoencoder detector, and a SHA-256 hash-linked ledger; hash matching caught every replay with zero false matches in 379,396 clean steps, but ledger-anchored recovery raised LunarLander replay return (178.4 to 264.6) and lowered CartPole (411.1 to 376.2, n.s.): perfect detection did not ensure safe recovery [3].
- Showed that detect-then-recover fails under CGM attacks on an RL artificial pancreas (exact-match replay detection never fired; the windowed detector fired on 62–94% of clean-reading steps); designed detector-free residual-LSTM reconstruction with a safety shield that lowered hypoglycemia risk (LBGI) under replay, drift, and FDI [4].
- Co-authored studies of LSTM-based integrity-attack detection [1], classical vs. quantum RL controllers [5, 11], AI-assisted NMR metabolomics evidence ranking [6], camera-assisted FDI recovery [8], hybrid quantum–classical histopathology image classification under noise and blur [9], and DQN robustness to Gaussian sensor noise [10].

Teaching Experience

Graduate Teaching Assistant, Introduction to Computer Science *Aug 2025 – Dec 2025*
Dept. of Computer Science, Tuskegee University • Supervisor: Dr. Kushagra Kushagra

Professional Experience (Bangladesh Civil Service)

Deputy Director (Senior Assistant Secretary) *Sep 2024 – Jul 2025*
Export Promotion Bureau, Ministry of Commerce

- Produced data-informed export-policy recommendations and worked with stakeholders to digitize trade facilitation.

Assistant Commissioner (Land) & Executive Magistrate *Nov 2022 – Aug 2024*
Upazila Land Office, Patuakhali & Bhola, Ministry of Land

- Managed digital land records and reporting; adjudicated land disputes and coordinated field operations.

Assistant Commissioner & Executive Magistrate *Apr 2019 – Nov 2022*
Office of the Deputy Commissioner, Cox's Bazar, Ministry of Public Administration

- Coordinated disaster-relief and COVID-19 response using ICT; administered public budgets, personnel, and electronic procurement.

Honors & Scholarships

- **Best Paper Award**, 7th Annual National HBCU Blockchain, FinTech, and AI Conference, 2026, for paper [3]
- **Eminent Scholar & Honor Roll**, Tuskegee University, 2025–26 academic year
- **Full Scholarship (Graduate Assistantship)**, M.S. program, Tuskegee University, 2025
- **Japan Human Resources Development Scholarship (JDS)**, Government of Japan, Hiroshima University, 2025 *(declined)*
- **Full Scholarship**, M.A. in Policy Economics, Williams College, 2025 *(declined)*
- **Bangladesh Civil Service (Administration) Cadre**, 37th BCS Examination: merit position 89 of 306 appointees from about 243,000 candidates
- **Prime Minister's Fellowship**, Government of Bangladesh, 2024
- **Foreign Master's Scholarship**, "Capacity Building of BCS Administration Academy (2nd Revised)" Project, Government of Bangladesh, 2024 *(declined)*
